The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 3-5, 15 and 16 are objected to because of the following informalities: "planarization" is misspelled. Appropriate correction is required.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Mueller-Fiedler '142, of record.

Claim 1 still does not distinguish over '142 where T2 is a substrate; Li is a lens above the substrate and below the laser LD; and LD is mounted on a top layer T1 above the lens. In other words, upside down or equivalently rotated 180 degrees, the '142 device anticipates claim 1. Claim 2 is rejected as previously because T1-T3 can be glass or silicon. Claims 3, 4 and 7 are likewise rejected as previously. Mueller discusses a lens "fitted in a planar manner" (col. 2). Lenses are typically glassy material. Hence a glassy lens fitted in a planar manner can obviously comprise a lens covered with a planar oxide material.

Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 15 and 16 are allowed.

Claims 5, 6, 15 and 16 further recite a contact pad above the top "dielectric" layer.
